

Master Clock/Time Server Set-up, Configuration and Monitoring

Easy Access, Manageability, & Security for Your Precision Timing System

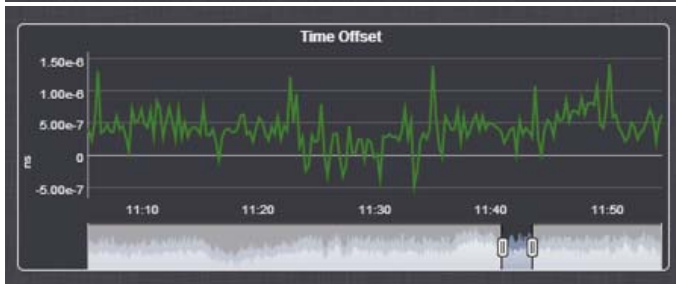

SecureSync® and NetClock® 9400 series offer set-up, configuration, and monitoring in a variety of ways, such as the front panel, RS-232 “console” port, or through many network services. However, its feature-rich browser interface provides the greatest access to all available tools.

Home Page

- Easy to navigate menu structure
- At-a-glance performance:
 - Reference configuration and status
 - System status and performance
 - Recent events

Performance Monitoring

- Visualize performance
- Graphing with zoom tool

Input/Output Signal Monitoring

- Visual tool to check signal ports
- Easy access to configuration and status
