

Why Buy Cybereason?

Cybereason's mission is to defend customers against all ransomware attacks. Organizations stuck on legacy AV are not protected from complex attacks. We arm our customers with the most sophisticated and easy to use defense platform in the market. This year, the Cybereason Defense Platform received the highest results in the history of the MITRE ATT&CK Evaluations and scored higher than any company.

We are proud to say that we are undefeated in the fight against ransomware.

EASY TO DEPLOY, USE & WORK WITH

- We build custom sensors for the operating systems in play
- Quick deployment with the help of the Cybereason technical team or a certified partner
- The Cybereason's technical team trains staff on the UI and how to maximize the platform
- We collect and correlate the data and malicious bits to formulate a story in real time. This "malicious operation" is simple to understand and react to in seconds
- We are an extension of your staff – Global SOC 24x7, eyes on your environment, proactively hunting and protecting

UNPARALLELED VISIBILITY

- We pull data from 30+ sources to detect threats with speed and precision
- Data is enriched with private and public threat intel feeds
- Data is categorized to allow for easy queries

SPEED, EFFICIENCY & EFFICACY

- Customers are able to focus on what matters, no more drowning in meaningless alerts
- We provide increased efficiency through a 1:200,000 analyst-to-endpoint ratio and automated single-click remediation
- Attack context within 1 minute of intrusion. All details for response within 5 minutes. Remediation within 30 minutes
- Highest rated solution in MITRE history: 100% protection, 100% real-time detection, and 100% visibility
